

Cloud (IaaS)

- Coarse grained distribution of datacenters
- High network latency
- Virtually unlimited computational resources

Cloud (FaaS)

- Coarse grained distribution of datacenters
- High network latency
- Virtually unlimited computational resources

Mobile-Edge (FaaS)

- Fine grained distribution of servers
- Low network latency
- Limited computational resources

Local-Edge (FaaS)

- Fine grained distribution of servers
- Low network latency
- Limited computational resources

Mobile (Local)

- Zero network latency
- Very limited computational resources
- Battery powered
